Looking back at our 22 years of existence, we are proud of our achievements. By producing almost every kind of blinds for inner use and the production of zip screen for outside use, we are constantly moving toward a promising future for our company, while aiming for continuous increasing growth.

Being an exclusive partner of Coulissee for Made-To-Measure blinds has resulted in numerous projects, some including large ones such as the Van-der-Valk chain hotels and Coulissee Headquarters. For these projects, we used the newest silent motors in 50 and 65 mm Venetian Wood blinds and Roman Shades, and also new absolute systems including new fabrics. Being a part of such projects has shown us that we are also competitive in the world market. For all our products of inner decoration we use exclusively Coulissee components and fabrics.

Beside being competitive in the world market for quality, by producing in a tax-free zone we also become attractive price-wise.

Our priority has always been to provide new varieties of choices for window decoration to our customers, and we have succeeded. Window decoration is not "just a product" anymore, it is becoming an essential part of a modern interior in every house and office. The new fabrics used in our products, like honeycell and screens, also contribute to energy saving, therefore making them even more attractive.

Këtë vit, kur të mbushen plot 22 vite që nga fillimi i veprimtarisë sonë dhe dy vite si C&E, mund të jemi krenarë për të arriturat tona. Duke prodhuar gati çdo lloj të roletave të brendshme dhe të zip screen për përdorim të jashtëm, ne jemi vazhdimisht duke ecur përpara drejt një të ardhme premtuese për kompaninë tonë, duke bërë kështu përpjekje për rritje të mëtejme.

Duke qenë partner ekskluziv i Coulissee për produkte të punuara sipas masës, ka rezultuar në realizimin e disa projekteve, ndër to edhe disa të mëdha siç janë dy projekte për zingjirin e hoteleve Van der Valk dhe për zyrat qendrore të Coulissee. Për këto projekte ne kemi përdorë motorët më të rinj 'të pazhurmshtëm' në Roletat Veneciane të drurit 50 dhe 65 mm dhe Roman Shade, si dhe sisteme të reja absolute duke përfshirë edhe materiale të reja. Duke qenë pjesë e projekteve të këtilla na ka treguar se ne gjithashtu mund të jemi konkurentë në tregun botëror. Në të gjitha prodhimet tona për dekorime të brendshme ne përdorim ekskluzivisht komponentat dhe materialet e Coulissee.

Me krijimin e zonës së lirë ekonomike në vendin ku bëhet prodhimi, përveç kualitetit ne bëhemi atraktive për tregun botëror edhe për nga çmimet.

Synimi dhe përkushtimi ynë ka qenë çdoherë që me risi të reja të kontribuojmë për një zgjedhje më të madhe në lëminë e dekorimeve të brendshme të dritareve – roleta, dhe këtë po e arrijmë. Dekorimi i dritareve nuk është më "vetëm produkt", ai po bëhet pjesë shumë e rëndësishme e enterierit modern të çdo shtëpie apo zyre. Materialet e reja si honeycell dhe screens që po i përdorim në prodhimet tona gjithashtu po kontribuojnë edhe në kursimin e energjisë dhe kjo i bën ato edhe më atraktive.

Petrit Ibrani

OUR FACTORY

Our factory opened in November 2012 with an area of 800m², including the Show Room of 100m². This modern factory equipped with machinery of the latest generation for the interior window decoration and zip screen production, enables us to be in step with our competitors in the global market.

SHOW ROOMS

The Coullisse Show rooms, in Albi Mall – Veternike and in our factory in Mitrovica, are stylish rooms in which we present our collection of blinds, as well as our wide range of motors for blinds. Furthermore you can take a look at our blind collection, sample presentation here. The show room allows us to demonstrate our entire product range to our customers in an inspiring atmosphere.

SAMPLE PRESENTATION

During these two years, C&E has created its own and unique collection of materials which are used in interior decoration. These catalogues account for all the fabrics and components we use in our production line.

CHILD SAFETY enjoy peace of mind

We want our systems to be childproof. Our range already includes systems that are child safe by nature, such as our motorized systems and systems with stick control. The parts can be design on almost every type of system and require no additional tools, expertise or experience. All components are designed according to the specifications indicated in the European legislation that is expected to become effective this year.

EDGE FINISHING for nature fabrics

Especially for the finishing edges of nature fabrics. With a new and unique machine the edges of the fabrics are sealed which prevents them from fraying. The finishing is recommended for all Nature fabrics.

ACCESSORIES
